

ANNEXURE-A

Detailed Scope of Work – Mobile App, Website and Common Systems

1. Mobile Application Features

- Instant Member Enrollment through e-KYC using PAN, DigiLocker or other government approved methods.
- Push notifications for payment reminders, auction alerts and promotional announcements.
- In-app chatbot support for frequently asked member queries.
- Interactive on-screen guidance for first-time users explaining buttons and features.
- Automated Refer & Earn system for member referrals with incentive credit.
- Member document vault for storing agreements and KYC documents.
- Family member mapping with proper authorization and verification.
- Intuitive dashboard displaying active chits, payment status and upcoming auctions.
- Real-time mobile access to account statements and payment history.
- Analytics dashboard for probable dividend and expected bidding patterns.

2. Website / Web Portal Features

- Public website displaying company information and chit scheme details.
- Secure member login portal.
- One-click chit information including group details, PSO, FDR and commencement dates etc.
- Analytics dashboard for probable dividend and expected bidding patterns.
- Training and help center for hosting tutorial videos and guidance.

3. Common System Features (App + Website)

- Transparent live auction mechanism with bid timer and history tracking.
- Payment gateway integration for online collections.
- Automatic update of payments into system accounting records.
- Automated payment disbursement to auction winners subject to approval process.
- Credit scoring system for members based on payment discipline and defaults.
- ERPNext integration for real-time financial synchronization.
- Automatic receipt generation and delivery via email.
- SMS alerts for important events, payments received and payment reminders.
- Automatic late fee calculation for delayed payments.

4. System Integrations

- Payment gateway integration for digital collections.
- SMS gateway integration.

- Push notification services.
- ERPNext accounting integration.
- Secure API connectivity between systems.

5. Security Requirements

- Secure login and authentication for members and administrators.
- Protection of financial and personal data.
- Regular backup mechanisms.
- Encrypted communication between application and servers.

6. Deployment Requirements

- Hosting configuration.
- Domain configuration.
- Database setup.
- Deployment of mobile application and web portal.
- Support during system launch.

7. Documentation and Training

- User manuals.
- Training videos.
- System documentation for operational usage.
